PROFESSIONAL SUMMARY

Data Analyst with hands-on project experience in **SQL, Python, Excel, Power BI, and DAX**, skilled in data cleaning, exploratory data analysis (EDA), data visualization, and dashboard development. Experienced in analyzing datasets, creating **KPI dashboards**, identifying trends and patterns, and translating data into actionable business insights. Strong foundation in **statistical analysis, data manipulation, SQL querying, and business problem-solving**, with a focus on delivering accurate and data-driven recommendations.

TECHNICAL SKILLS

Languages: Python, SQL

Data Analysis: Pandas, NumPy, Exploratory Data Analysis (EDA), Data Cleaning, Data Manipulation, Statistical Analysis

Visualization: Power BI, DAX, Matplotlib, Seaborn, Excel Dashboards, Data Visualization, KPI Reporting

Excel: Pivot Tables, XLOOKUP, INDEX-MATCH, SUMIFS, COUNTIFS, Conditional, Power Query, Formatting, Charts, Data Cleaning

SQL: Joins, Subqueries, CTEs, Window Functions, CASE Statements, Aggregate Functions, GROUP BY, HAVING, Data Filtering

Tools: Jupyter Notebook, Microsoft Excel, Power BI, GitHub

PROJECTS

Superstore Sales & Profit Analytics | SQL, Power BI, DAX

GitHub Project Link - <https://github.com/yashraygade/superstore-sales-analytics>

- Analyzed Superstore sales data using SQL to evaluate sales, profit, orders, product categories, customer segments, regions, and shipping performance.
- Developed an interactive Power BI dashboard containing **10+ KPIs and 5 analytical views** to evaluate sales, profit, regional, and customer performance.
- Created DAX measures to track key business metrics and identify high-performing and underperforming areas.
- Generated data-driven insights to support sales, profitability, and business performance analysis.

Customer Churn & Retention Analytics | Python, Pandas, Power BI

GitHub Project Link - <https://github.com/yashraygade/-Customer-Churn-Retention-Analytics>

- Cleaned and analyzed customer churn data using Python and Pandas, performing exploratory data analysis to identify factors associated with customer churn.
- Examined churn patterns across contract type, tenure, monthly charges, payment methods, and customer characteristics.
- Built an interactive Power BI dashboard with churn KPIs, customer segments, trends, and retention-focused analysis.
- Identified high-risk customer segments and developed data-driven recommendations to support customer retention strategies.

Phone pe - Transaction Analytics- | Python , Pandas, Power BI

GitHub Project Link- <https://github.com/yashraygade/PhonePe-Transaction-Analytics->

- Analyzed PhonePe transaction data using Python and Pandas to identify transaction trends, user behavior, and overall business performance.
- Cleaned and transformed transaction data and performed exploratory data analysis (EDA) to identify patterns across transaction types, states, districts, and time periods.
- Built an interactive Power BI dashboard with key transaction KPIs, trends, geographic analysis, and user-focused insights.
- Identified high-performing regions and transaction patterns and generated data-driven insights to support business and digital payment analysis.

Education

Bachelor of Engineering – Computer Engineering 2024 – 2028 Smt Kashibai Navale College of Engineering CGPA: 8.2

Higher Secondary Education (12th Grade) 2022– 2024 Chhatrapati Shivaji Junior College Jalgaon 83.00%

Central Board Of Secondary Education (10th Grade) 2021 – 2022 SBS International School 75.4%

CERTIFICATIONS

-
- Deloitte Data Analytics Job Simulation — Forage | Certificate
 - SQL for Data Science — University of California, Davis (Coursera) • Python for Data Science, AI & Development — IBM (Coursera)

ADDITIONAL INFORMATION

Core Strengths: Analytical Thinking, Problem Solving, Data Storytelling, Business Intelligence, Attention to Detail, Communication
